Duravit India Plant

State of an art facility – Completely subsidiary of Duravit AG
 Established in 2010 at Tarapur, Gujrat.
 Current production : 1,80,000 pcs /Annum

100 % Natural raw material

Sanitary ceramic is a natural product that we obtain from naturally occurring materials. All ceramics are therefore unique by nature.

Even before delivery, the raw materials are quality-tested in the in-house laboratories - only flawless materials that have been checked are delivered to the Duravit plants.

Duravit Ceramics manufacturing process highlights

- Colour consistency
- Single colour across the world
- No colour variation
- No colour grades for project products

- Glaze thickness – 0.8 to 1 mm
- Enhance product life
- Less maintenance

Duravit Ceramics manufacturing process highlights

- During the firing process, Duravit “treats” the ceramic to lots of time - about 24 hours, as well as a particularly high temperature of 1280°C
- This gives Duravit sanitary ceramics a deep gloss effect that lasts a lifetime!

- Monitoring the raw material
- The surface is roughened and prepared to “absorb” the glaze.
- Sharp transitions are pre-glazed
- Pre-glazing in WC pan area

WC Flushing Tests

Solid Object Tests with Balls

Water exchange

Post-Flush-Water Test

Splashing Test (DIN)

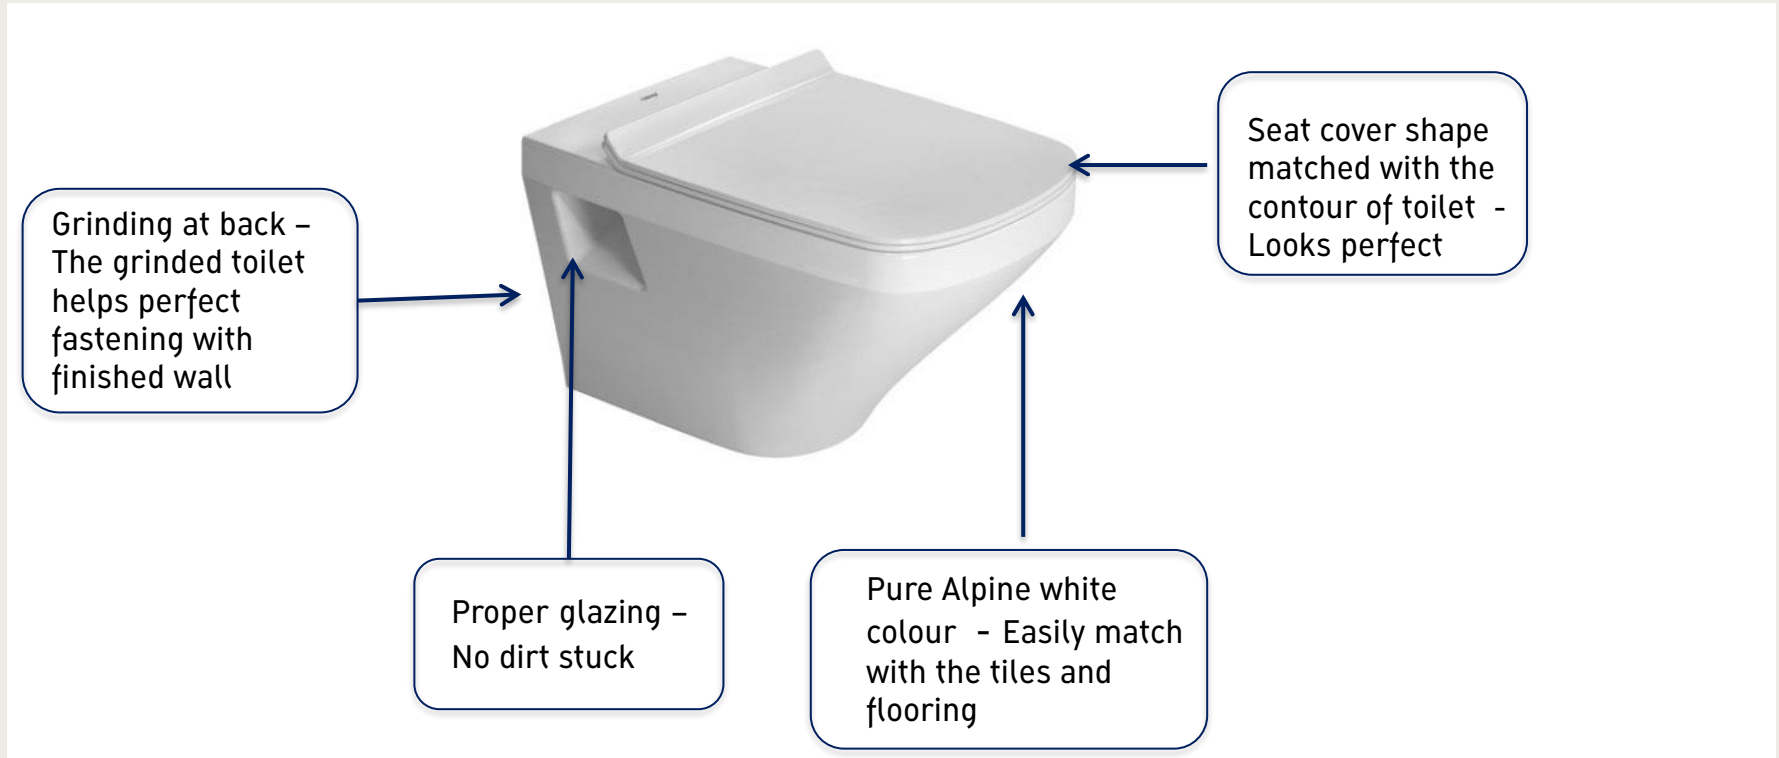

Flushing of inner bowl

Pipeline Test

Toilet features : Aesthetic

What is inside the Wall hung toilet ?

**Box rim holes - Perfectly crafted -
Water comes with pressure, Clean
bowl**

**Fully glazed trap : Waste flushes
easily, no smell**

**Curve given for flushing with 4.5
litres of water**

Toilet features : Installation

**CLOSED SIDES
INVISIBLE FIXING
SMOOTH CERAMIC
SURFACE EVERYWHERE**

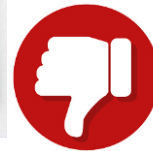

Toilet features : Installation

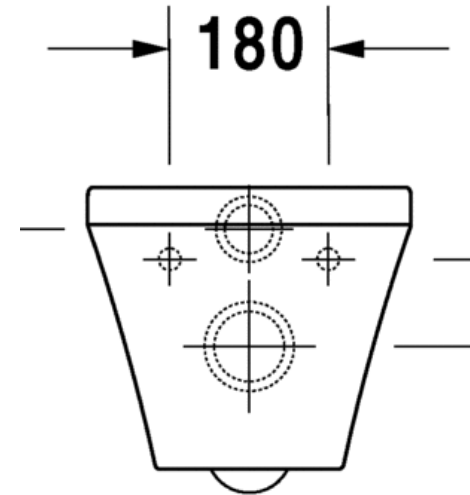

- Easy installation
- All metal parts
- Hassle free installation
- No visible rack bolts

**Installation with
Durafix
(Patented Technology)**

Toilet features : Installation

**What to do, if rack bolt distance is not same for Wall hung toilets ?
Breaking of tiles and shifting piping system ?**

Duroplast seat covers

- **Duroplast (Urea formaldehyde) seat covers for all toilets**
- **Very high strength**
- **Comfortable sitting**
- **Durable**
- **Anti-Static**
- **Resistant against UV-light,
stains, scratches, cigarette burns**
- **Dampers are developed and tested for 50,000 cycles**

IMPORTED

Duroplast seat covers

TAKEN
OFF

- High grade hinges
- Can be removed with just one movement
- Convenient cleaning

In built jet toilets

- Easy cleaning
- Maintenance free
- Durable
- Unique design
- Nozzle adjustable
- Brass adapter with plastic coating - No rusting
- Available in selected models

Comparison : Flushing technology

WC with conventional
flushing rim

Narrow and open,
partially unglazed

Closed and glazed

WC without flushing rim

Easy to clean

Excellent area flushing
of inner bowl

No flushig rim,
no ledge

Duravit Rimless with „ledge“
and open rim

Duravit Rimless® - Innovative and effective

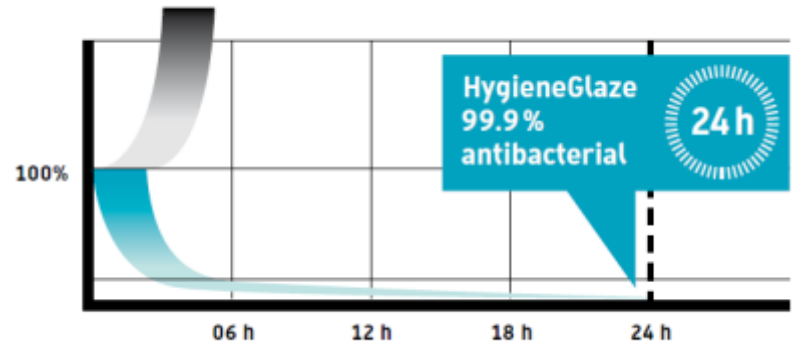

- **Easy access to all parts and areas of the bowl** – for a plus in hygiene and ease-of-cleaning
- Water flows in the open rim area with a **ledge** on top which prevents from oversplashing - which is otherwise common with those kinds of technologies
- Excellent **4.5 l flush** – effective and efficient
- Especially **large water spot** in the siphon area
- Available for nearly all Duravit series – an unlimited variety
- Even more efficient with WonderGliss®

HygieneGlaze 2.0

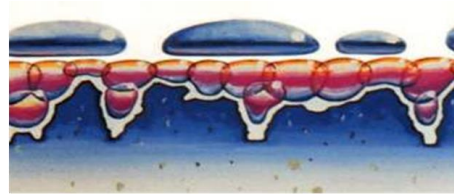

- Hygiene Glaze 2.0 inhibits the growth of bacteria
- Integrated into the glaze and fired into the ceramics permanently .
- Duravit's HygieneGlaze 2.0 sets an unprecedented hygiene standard.
- After just six hours, 90% of the bacteria (such as Escherichia coli) is killed.
- After 24 hours, 99.999% of the bacteria have been eliminated; an unprecedented level.
- Available in all Toilets

WonderGliss

Without WonderGliss

With WonderGliss

WonderGliss

- Finish burned onto the surface
- Easy cleaning of surface
- Does not provide contact surface for dirt, limescale etc.
- Less deposit – less cleaning

DuraCeram- Material of Future

- 5 mm thick edges
- Extreme Accuracy
- High Strength
- Elegant finish
- More dimensional stability
- Slim and strong with finer forms

DuraCeram- Material of Future

Diamond ground Ceramics

Benefits:

- Results in extremely flat, smooth surface
- Lines up precisely with counterpart (furniture / wall)
- No unaesthetic silicon joint to „straighten“ the basin

Diamond ground Ceramics
